

ETHER.FI CASH · STEP-BY-STEP GUIDE

From your bank to NeuralBet, *in four steps.*

An ether.fi account turns a simple bank transfer into USDC, the "digital dollar" NeuralBet accepts. Four pages are enough to do everything — even if you have never touched crypto.

01

Create the account, verify your identity

Required before any bank transfer: ID document, selfie, proof of address.

PAGE 2

02

Deposit money

A SEPA transfer to your ether.fi IBAN. It arrives as USDC.

PAGE 3

03

Send to NeuralBet

Paste the address, choose Ethereum, confirm.

PAGE 4

04

Collect your earnings

From NeuralBet to ether.fi, then to your bank.

PAGES 5-6

YOUR SIGN-UP LINK

<https://www.ether.fi/@lcnb>

Open this link (or scan the QR code) before creating the account: the referral code **lcnb** is applied automatically.

Real screenshots of the app (September 2026), sample data. Labels may change slightly.

Create the account, *verify your identity*.

Without this verification, ether.fi only accepts crypto, no bank transfers. Keep your ID document and a recent bill at hand.

01 Open your sponsor's link, tap "Sign Up Today".

The "You've been invited!" page appears with the code **lcnb** already applied.

02 Choose "Personal", enter your e-mail.

A code arrives by e-mail: type it in. You are in the app.

03 Start the verification.

Menu under your name (top right) → **Settings** → **Verification**, or directly **ether.fi/app/cash/settings/verification**. Complete the **Banking** block: a few questions, ID document, selfie, proof of address.

04 Wait for "Active" on Banking.

Usually within 48 hours, longer if ether.fi asks for a document. "Send & receive transfers ✓ Active": bank transfers are open.

Your real name, exactly as on your ID.

And a first transfer from an account in that name, as ether.fi recommends.

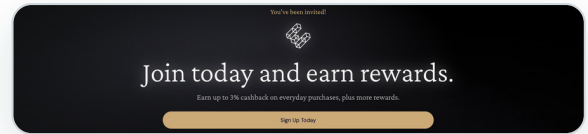

To come back later:

ether.fi/app/cash → "Log in" → your e-mail → the code you receive.

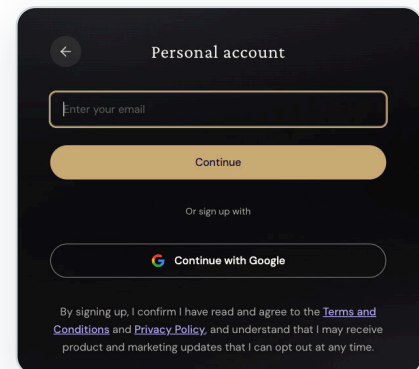

! No verification, no bank transfer

- Until **Banking** shows "Active", only "Crypto" works: "Deposit" → "Cash" stays locked.
- Words such as **verify**, **verification**, **KYC**, **pending** or **under review** all mean the verification is not finished.
- If ether.fi first asks for a \$10 crypto deposit (a rule for new accounts): buy 10 to 50 USDC with your bank card, for example on Coinbase, and send them to your ether.fi deposit address (page 6).
- Valid ID: passport, national ID card or driving licence. Proof of address under 3 months old: energy, water or internet bill, bank statement. Not accepted: mobile phone bill, screenshot.

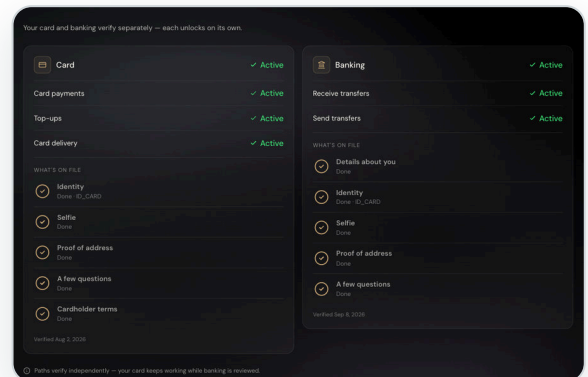

i Tip · Is your sponsor a friend? They can send you those 10 USDC directly: no other account to open, no purchase fees, done in a few minutes.

INVITATION · CODE LCNB APPLIED

SIGN-UP · E-MAIL OR GOOGLE

VERIFICATION · BANKING = BANK TRANSFERS

Deposit money *by bank transfer*.

Your euros arrive as USDC within minutes, ready to go to NeuralBet.

! **"Cash" locked, only "Crypto" works?** Your Banking verification is not finished: see page 2.

01 Home → "Deposit" → "Cash" → "EUR".

Then "SEPA transfer (EUR to USDC)": the option that turns your euros into USDC.

02 Copy your deposit details.

IBAN, BIC, your name: these are **your** personal details at ether.fi. "Copy All" copies everything at once.

03 Make the transfer from your bank.

SEPA (instant if possible), to this IBAN, in **your name**. Usually credited in under 5 minutes.

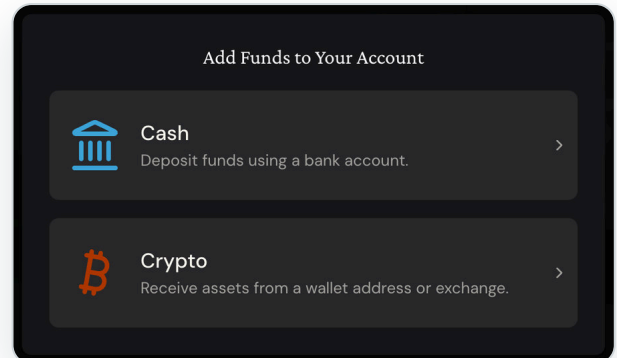

FEE 0.90 € + 0.15% per transfer

TIME a few minutes, at most 1-2 business days

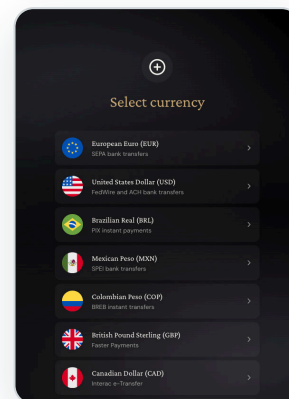

RATE 1 EUR ≈ 1.15 USDC when this guide was written, shown on screen

Start with 10–20 €.

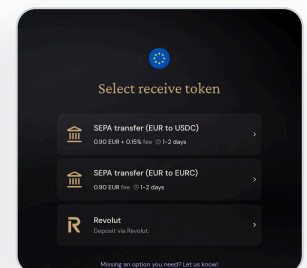

The first transfer validates the whole route; the real amount follows once it has arrived.

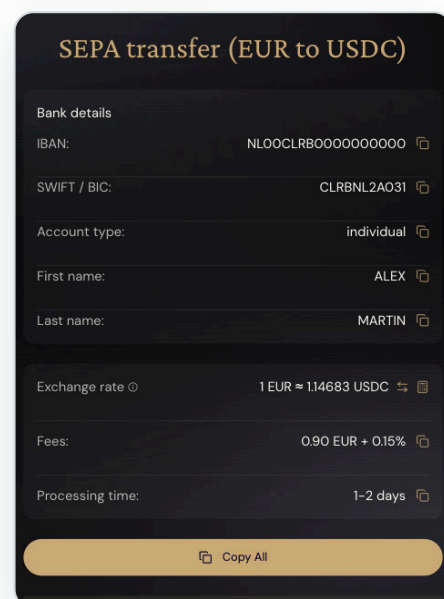

DEPOSIT · CASH OR CRYPTO

CURRENCY · EUR · SEPA

EUR → USDC · THE OPTION TO PICK

YOUR DETAILS · IBAN TO COPY

Send your USDC *to NeuralBet.*

Three screens. The address is copied, never typed by hand.

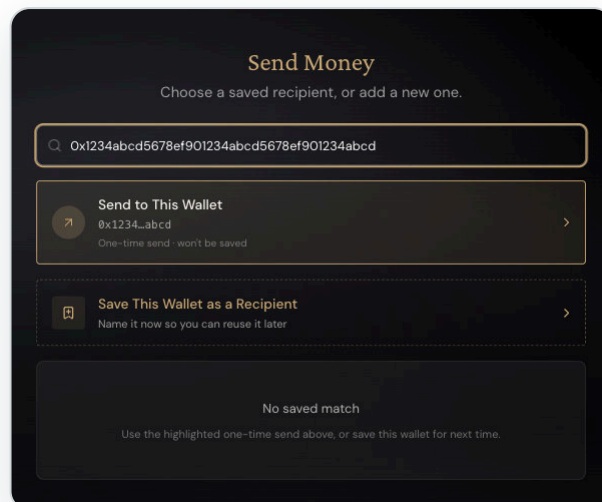

- 01 In NeuralBet, copy your USDC deposit address.**
Funds → Deposit → Copy button. 42 characters starting with 0x.
- 02 In ether.fi: Home → "Send", paste the address.**
Tap "Send to This Wallet" (one-time send) — or "Save This Wallet as a Recipient" to reuse it.
- 03 Network: choose "Ethereum".**
It is the network NeuralBet accepts for USDC. Polygon is not offered for sending.
- 04 Amount, "Review", confirm.**
Bridging fee usually 0.00 USDC, arrival in 15 to 20 minutes. Follow the operation in "Transactions".

Test with 5–10 USDC.

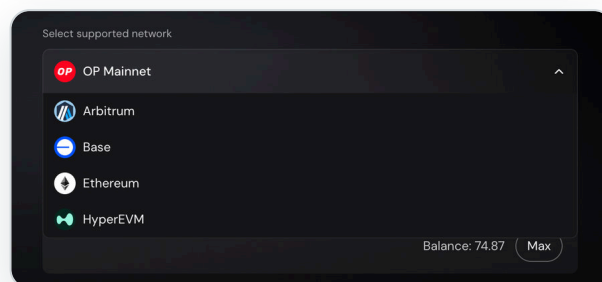

Once they have arrived, send the rest. A crypto transaction cannot be cancelled.

Compare the start and the end of the address.

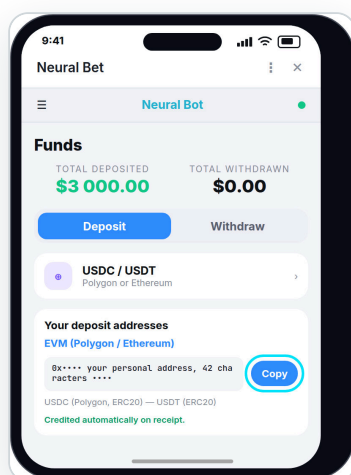

The first 4 and last 4 characters must match the original.

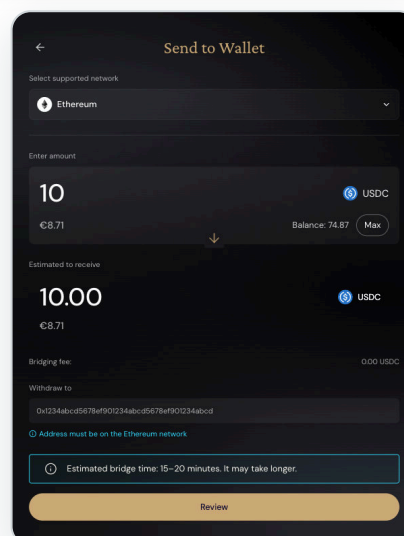

PASTED ADDRESS · ONE-TIME SEND OR SAVE

NETWORK · ETHEREUM FOR NEURALBET

IN NEURALBET · FUNDS → DEPOSIT → COPY

AMOUNT · READY FOR REVIEW

Send your earnings *back to your bank.*

Save your bank account once; each later send takes thirty seconds.

01 Home → "Send" → "New Recipient" → "EUR · SEPA".

For another currency (USD, GBP, BRL, INR...), pick it here.

02 Fill in the form.

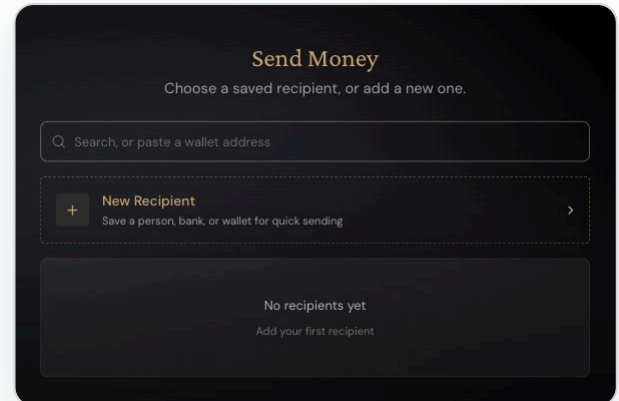

Nickname, **Full Name** (the account holder, exactly), tick "This is my own account", **Bank Name**, **IBAN**. "Continue", then check the Review screen.

03 To send: "Send" → your bank → amount → Review → confirm.

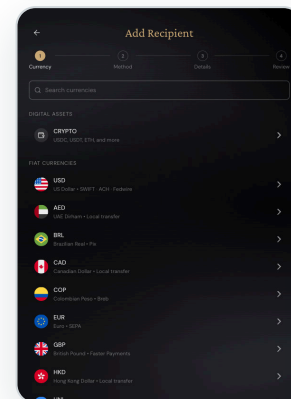

Your USDC are converted into euros and transferred, within one business day.

Check the IBAN twice.

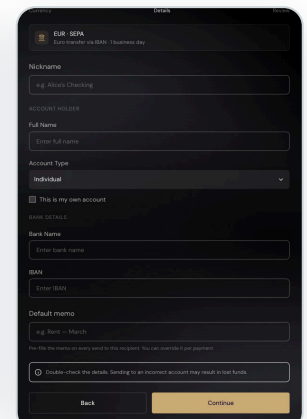

"Sending to an incorrect account may result in lost funds": a transfer sent to a wrong IBAN does not come back.

SEND MONEY · YOUR RECIPIENTS

CURRENCY · EUR · SEPA

FORM · NAME, BANK, IBAN

Receive USDC *on ether.fi.*

From NeuralBet (withdrawal) or from any wallet or exchange: you give an address, they send.

01 Home → "Deposit" → "Crypto" → "Share your deposit address".

02 Token: "USDC". Network: the one the sender uses.

NeuralBet withdraws in USDC on **Polygon**: choose Polygon. Fourteen networks are offered (Ethereum, Base, Arbitrum, Solana...).

03 Copy the address with the button, paste it on the sender's side.

In NeuralBet: Funds → Withdraw → withdrawal address → Confirm. The USDC arrive within minutes.

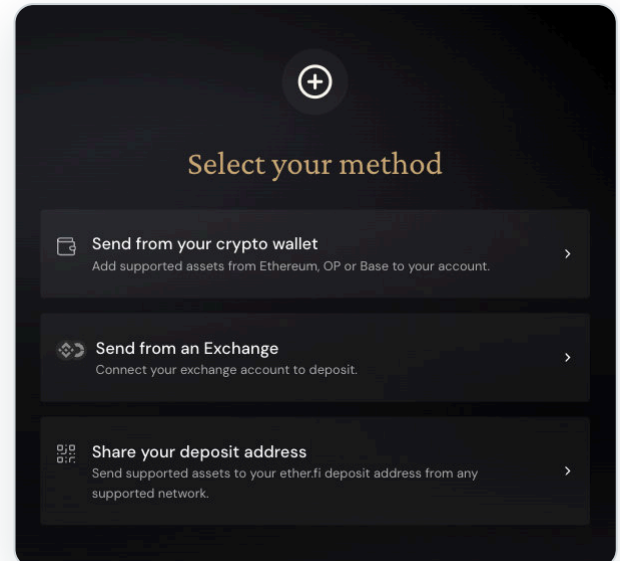

The address only receives the chosen token and network.

"USDC · Polygon" only receives USDC sent on Polygon. Another token or network: funds lost.

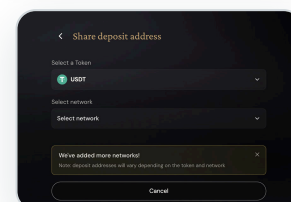

It changes with the token / network pair.

Generate it again in the app for each deposit rather than copying it from memory.

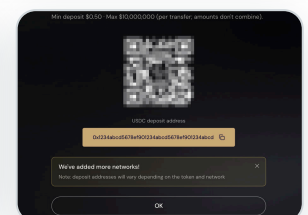

i Already have a wallet (MetaMask, Rabby, Phantom) or a Coinbase account? The first two methods on the screen connect them directly, without copying any address.

METHODS · WALLET, EXCHANGE, ADDRESS

TOKEN AND NETWORK · USDC
ON POLYGON

YOUR ADDRESS · COPY IT WITH
THE BUTTON

What else *your account* can do.

Nothing mandatory. To discover once the four steps are mastered.

THREE WORDS TO KNOW

USDC

a crypto that is always worth about 1 dollar. The working currency of your account.

Network

the "road" a crypto travels on (Ethereum, Polygon...). Sender and recipient must use the same one.

Address

the IBAN of crypto: 42 characters starting with 0x. Copied, never typed.

Cards

An instant virtual Visa card (works with Apple Pay and Google Pay) and a physical card delivered to you. Every payment earns cashback.

Earn

Your balance (EUR, USD, ETH, BTC...) earns automatically, with no lock-up. Rates change every day.

Markets and Swap

Buy gold, stocks or bitcoin with your USDC, or exchange one crypto for another.

Travel

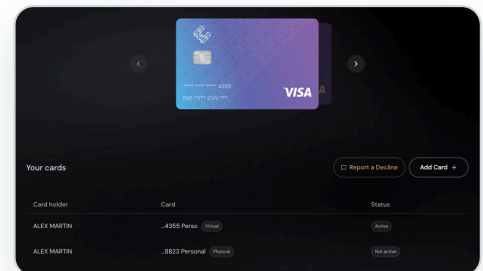

Hotels and flights at negotiated prices, plus 5% cashback when paying with the ether.fi card.

Refer & Earn

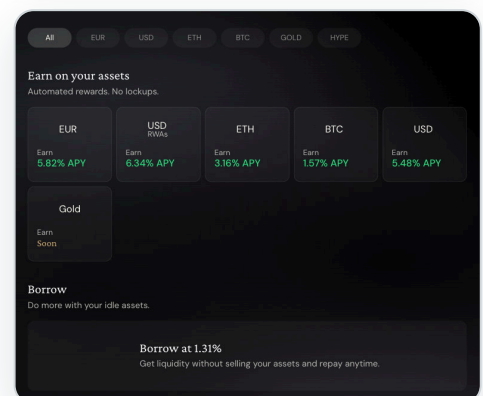

Your own link ether.fi/@your-code: you earn rewards when your referrals spend.

Preferences

Display currency (EUR, USD...), app language (English, Español, Português, 繁體中文), alerts.

CARDS · VIRTUAL AND PHYSICAL

EARN · AUTOMATIC YIELD

Prices and yields visible in the screenshots change constantly. This guide explains the app; it is not investment advice.

Four habits *that protect your money.*

None of them takes more than ten seconds.

01 The code you receive by e-mail is never shared.

Not with "support", not with a relative, not with anyone claiming to help: whoever asks for it wants your account.

02 Address: copy, compare, test small.

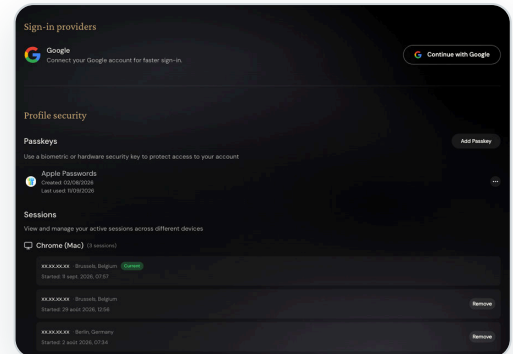

Start and end identical to the original; a first send of a few USDC.

03 The right network, or nothing.

Ethereum to send to NeuralBet, Polygon to receive from NeuralBet.

04 The real site, the real support.

Bookmark www.ether.fi. Official support: support@ether.fi. In Settings → Security and privacy, add a passkey and remove unknown sessions.

SECURITY · PASSEY AND SESSIONS

FREQUENTLY ASKED QUESTIONS

My transfer does not show up.

Check the name (yours), the IBAN and the delay (up to two business days). Then: Support, in the menu under your name.

USDC or EURC?

USDC follows the dollar, EURC follows the euro. For NeuralBet, keep USDC.

Where are my operations?

"Transactions" in the left menu: every deposit, send and receipt, with its status.

How much does a deposit cost?

0.90 € + 0.15% for a SEPA transfer. Crypto sends show their fee before confirmation, often 0.

Can I send on Polygon?

Not for sending (OP Mainnet, Arbitrum, Base, Ethereum, HyperEVM). For receiving, yes.

"Cash" is locked, only "Crypto" works.

Your Banking verification is not finished: Settings → Verification (page 2).
